

Atlas Saw & Tool, LLC

MARKET LEADER IN PLASTIC SAW BLADES | SHARPENING SERVICES | BLADE MANAGEMENT

Atlas Saw & Tool products and services meet the cutting needs of frame shops, PSPs, OEMs and manufacturers across a range of industries, including picture framing, plastics, sign & graphics and woodworking.

Engineered Plastic Blades

ACRYLIC | MECHANICAL PLASTICS | PHENOLIC | FOAM BOARD

ACRYLIC - Acrylic RV saw blades are engineered to reduce chipping on thin acrylic sheets and have a unique grind pattern that reduces heat and prevents melting.

MECHANICAL PLASTICS - Atlas' mechanical plastic saw blades have a unique tooth geometry design that allows for a smooth, easy cut on ultra-low melt plastics, such as nylon, polypropylene, UHMW and HDPE.

PHENOLIC - Our phenolic blade design has a modified ATB grind that is ideal for cutting difficult engineered materials like paper, linen and canvas. Filled phenolic blades have a diamond grit specially designed for all grades and thicknesses of material.

FOAM BOARD - Our foam board blades have a thin kerf design with sharply pointed shear faced teeth that produces razor sharp cuts without tearing or blowing out material. This market-exclusive blade design and geometry is only available through Atlas Saw & Tool. *Please contact for sizes and availability.*
