

FRAMEWARE^{LLC}

Hanging Hardware Systems

The industry's best source for quality hardware

Hanging Hardware Systems

Who is Frameware?

Frameware is one of the most respected US manufacturers and distributors of high-quality hanging hardware products serving multiple industries. Operating out of a 25,000 square foot manufacturing and warehousing facility, Frameware offers product distribution services, bulk packaging of hardware components, private label and custom packaging services, and product sourcing expertise.

As part of the Fletcher Business Group brands of solution technologies, Frameware’s key hanging products are off-set clips, Heavy Duty Cleats, (ranked the highest weight capacity in the industry, US produced), aluminum moulding, picture hanging wire and strap hangers, and security hardware kits for hospitality and other business facilities requiring safe, secured hanging.

Frameware’s business philosophy for the last 35 years is to set and lead the industry standard in terms of product quality and performance for its hardware line of products.

Your Aluminum Moulding Source

Frameware specializes in quality aluminum picture frame moulding and offers both standard and custom moulding for picture framing, hospitality, museums, and public space markets. We maintain stocking inventory levels for product availability and quick delivery turnaround. We are a primary supplier that is able to source and deliver what you need, within your cost budget, and delivery requirements.

Custom Packaging and Private Label

Frameware offers custom packaging solutions for the OEM and online retailers allowing them to attach hardware kits as part of their finished products. It can be simply a functional clear bag with printed instructions, or the package can be private labeled bringing additional value to your end consumer. Being a US manufacturer, we have the ability of supplying both smaller and larger quantities which can be difficult to source from other off-shore suppliers.

PICTURE FRAMING HARDWARE

Tapped Angles & Back Plates - BULK Packaging

Tapped angles and back plates are the most common components used in assembling metal frames. Since most extrusions/profiles use the same hardware channel dimensions, this allows for a simple and standard assembly process with virtually any metal moulding.

PRODUCT	DESCRIPTION	PART NUMBER
 COMBO HEAD SCREW SLOTTED HEAD SCREW	Tapped Corner Angle With #2 set screw locked in at a set depth. Use with part 401NA. Available with a Phillips/Slotted Combo Head screw or Slotted Head screw. Silver finish.	401TB1/4C
		401TB1/4
	Tapped Corner Angle Extra long #2 set screw, requiring no back plate. Recommended for frames under 11" x 14". This part is only available with slotted head screws. Silver or black finish.	401QCS
		401QCSB
	Heavy Duty Aluminum Tapped Corner Angle 3/16" thick with slotted set screws. No back plate required, which speeds up frame assembly time. Silver finish.	401 CAS
	Self-Locking Corner Angle This corner angle does not require any tools to install; simply open the clip, insert into the hardware channel of the moulding, and "snap" down to lock into place. No back plate required.	401W
	Back Plate Used with the 401 TB Tapped Angle. Made with hardened steel, which protects your metal moulding from over tightened set screws. Silver finish.	401 NA

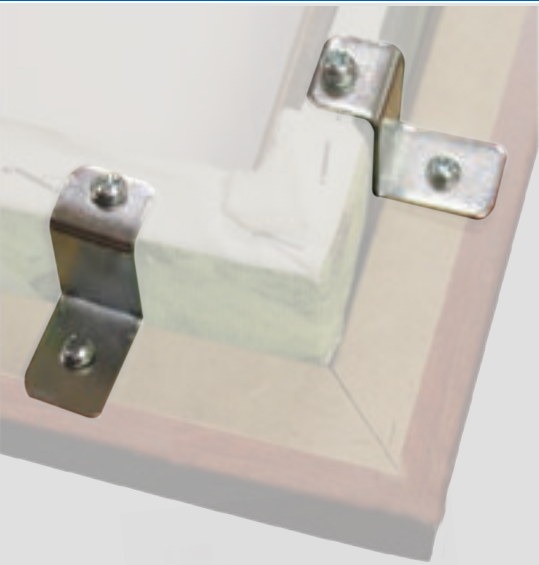

Hanging Hardware for Metal Moulding - BULK Packaging

The various parts listed below are used to finish and hang your metal frames.

PRODUCT	DESCRIPTION	PART NUMBER
	Spring Clip 3/8" deep bend spring with round corners and center notch. For side load frames, used to compress the excess space in the framing channel. Silver finish.	402C
	European Hanger European hanger with 10/32" slotted set screw and a teardrop opening. Silver finish.	448S
	Snap In Hanger Snap in hanger, sits in the hardware channel after the frame is assembled. Silver finish.	416
	Screw In Hanger Aluminum screw in hanger with 10/32" slotted set screw inserted. Silver finish.	417S
	Saw Tooth Hanger Snap in recessed saw tooth hanger, sits in the hardware channel. No tools required! Silver finish.	ST2010
	3 Part Hanger 3 Part Hanger, pre-assembled. 441 Screw and "D" Ring. Silver Finish.	404 3 Part Hanger
		441 Recessed Plate w/ 8/32" Threaded Hole
	"L" Shaped Hanger Heavy duty "L" shape hanger with 1/4" x 28" set screw inserted. Silver finish.	442S
	Notched Saw Tooth Snap in saw tooth hanger, sits in the hardware channel. No tools required! Silver finish. Priced per each.	FWHA09

Canvas Offset Clips - BULK & FRAMER’S PACK

Canvas offset clips are used for a variety of purposes, the most common being to secure a stretched canvas or other objects into a frame with a shallow rabbet. Place your canvas in the frame and measure the distance from the back of the frame to the back of your canvas to determine the size needed.

PRODUCT	DESCRIPTION	PART NUMBER	OFFSET DEPTH	HOLES
	Standard Pack 100 Pieces Canvas Offset Clips Priced per each All canvas offset clips come with a zinc plated finish and are offered in a one or two hole variety.	317	0"	2

		405N - Unplated

Frameworkare Heavy Duty Cleat

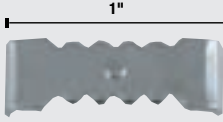

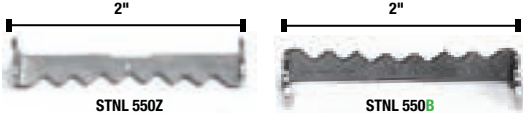

The hospitality industry's most specified cleat. Our cleats are made with heavy duty aluminum, which makes it more durable when extra security is needed and safer for heavier installations. Our cleats are predrilled four inches on center with elongated holes for easy leveling.

PRODUCT	DESCRIPTION	PART NUMBER	LENGTH	NUMBER OF HOLES	MAX WEIGHT
	422 - Heavy Duty Cleat* Heavy duty cleats, when properly installed, are rated for 100 pounds per foot and sit tight against the wall. This helps to prevent thieves and vandals from getting their hands or fingers behind the frame, making it exceptionally difficult to remove the frame from the wall. 	422	6"	2	50lbs.*
		422-12	12"	3	100lbs.*
		422-18	18"	5	150lbs.*
		422-24	24"	6	200lbs.*
		422-30	30"	8	250lbs.*
		422-36	36"	9	300lbs.*
		422-42	42"	11	350lbs.*
		422-48	48"	12	400lbs.*
		422-72	72"	18	600lbs.*
	522 - Heavy Duty Offset Cleat* In addition to the industry standard heavy duty cleat, Frameworkare offers a cleat with a deeper offset. This offset is designed for more challenging installations where uneven walls or surfaces may be present. Holds up to 75lbs. per foot when properly installed.	522-60	60"	28	375lbs.*
		522-120	120"	58	750lbs.*
	623 - Heavy Duty Aluminum Cleat* Frameworkare's strongest cleat to date, which is an ideal tool for hanging facade panels, shelves, headboard, art, frames, cabinets and heavy mirrors. Sold in 72- & 144-inch lengths. 1.375" wide, material thickness .250. No holes punched.	623	12'	-	-
 *NOTE: CHOKING HAZARD, CONTAINS SMALL PARTS	Heavy Duty Cleat - Retail Pack* This system is prepackaged with screws and anchors and is designed to hang one frame with proper installation. Poly bags include: 2 cleats of your desired length, screws and anchors to complete one frame. Custom sizes available upon request.	PB422-6	6"	2	50lbs.*
		PB422-12	12"	3	100lbs.*
		PB422-18	18"	5	150lbs.*
		PB422-24	24"	6	200lbs.*
		PB422-36	36"	9	300lbs.*
		PB422-48	48"	12	400lbs.*

**proper installation includes securing to a stud when possible /using the proper wall anchors*

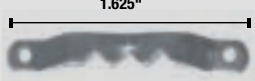

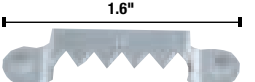

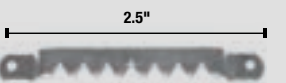

Self Attaching Saw Tooth Hangers - LOOSE/BULK Packaging

Self attaching saw tooth hangers are perfect for small or lightweight frames. Simply center on the back of the frame and gently hammer the points into the moulding until secure. The built in dimple marks the wall for nail placement, making hanging your frame even easier!

- The moulding chops will be mitre cut, cleaned, and wrapped in pairs
- Price includes all hardware*: taped corner angles, back plates, and spring clips. Hangers are not included
- Made in the USA
- Wide variety of hangers available for purchase

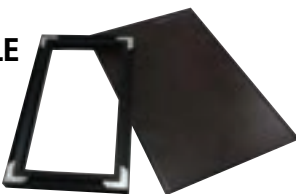

*SEE PAGE 11 FOR HARDWARE DETAILS

Profiles for Surface Mounting

Metal moulding from Profiles by Framework is the fastest and easiest way to hang a variety of die-sublimated materials such as acrylic, aluminum, and other graphics or signage. Using metal moulding allows your artwork to "float" off the wall, and gives you a variety of options for hanging. Works perfectly with Profiles #28, #94, #95, #9 You will need: 7, #109 and the NEW #115.

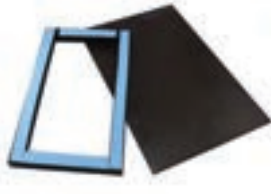

ASSEMBLE ATTACH HANG

ASSEMBLE THE FRAME USING TAPPED ANGLES AND BACK PLATES. PROFILES BY FRAMEWARE OFFERS A COMPLETE CHOP PROGRAM WHICH INCLUDES THESE PIECES.

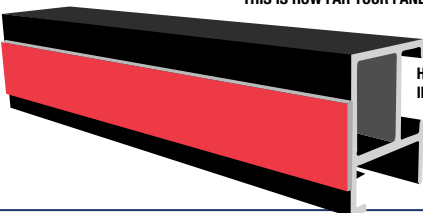

EXTREME HIGH BOND TAPE (PAGE 36)

ATTACH THE EXTREME HIGH BOND TAPE (PAGE 36) TO THE TOP OF THE MOULDING. REMOVE THE PROTECTIVE LAYER FROM THE TAPE. CENTER THE ARTWORK OVER THE FRAME, AND PRESS FIRMLY TO THE BACK OF YOUR IMAGE.

EHB TAPE ATTACHES YOUR PROFILE TO THE PANEL

THIS IS HOW FAR YOUR PANEL WILL SIT OFF THE WALL.

HANGING HARDWARE GOES IN THIS CHANNEL

Hang the finished artwork using your preferred method. We recommend a Framework Heavy Duty Cleat - it fits directly into the channel of the moulding. For extra security, use the Frameloc System.

SECURITY HARDWARE

Three-Point Security System

The Three-Point Security System is a less expensive alternative to the Frameloc System. Great for hotels, hospitals, restaurants and other hospitality services.

MOULDING BRACKETS

MOULDING BRACKET

SECURITY TEE SCREW

MOULDING BRACKET

THREE POINT SECURITY SYSTEM

HANG MOULDING BRACKETS ON WALL BRACKETS

TURN CLOCKWISE TO LOCK

STEP 1

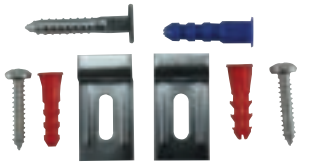

First, mount hardware on the wall and frame. Try to mount on wall studs, or use wall anchors if not available. Leave the head of the Security Tee Screw in a horizontal position.

STEP 2

Place the frame on the wall, hanging the Moulding Brackets on the Wall Brackets. Make sure the Moulding Bracket on the bottom rail fits over the Security Tee Screw.

STEP 3

Slide the Security Wrench under the frame and clamp onto the neck of the Security Tee Screw. Turn 90° clockwise, locking the Security Tee Screw into the Moulding Bracket.

PRODUCT	DESCRIPTION	PART NUMBER	PART DESCRIPTION
	Three-Point System for Wood Poly bags contain hardware for both wall and frame, enough for one frame. Requires a Security Wrench (part #423), sold separately.	PBS13	Poly bag for (1) Wood Frame
	Bulk packs contain hardware for both wall and frame, enough for one hundred frames. Includes (1) Security Wrench (part #423).	BPS13	Bulk Pack for (100) Wood Frames

Lineco Archival Products

PRODUCT	DESCRIPTION	PART NUMBER	PART DESCRIPTION
	Gummed Linen Hinging Tape Great for heavy watercolors or collages. The 65/55 thread count, acid free fabric gives plenty of strength. The high tack neutral pH sets fast and lays flat.	L533-1025	1" x 30'
		L533-1050	1" x 150'
		L533-1010	1" x 300'
		L533-1520	1.5" x 300'
		L533-2020	2" x 300'
		533-3020	3" x 300'
	Self-Adhesive Linen Hinging Tape A favorite for hinging window mats to backboard or attaching art. The very fine line cloth is flexible yet strong. The neutral pH acrylic gains strength overnight.	L533-1055 White	1.25" x 150'
		L533-1056 Black	1.25" x 150'
		L533-1015 White	1.25" x 35'
		L533-1016 Black	1.25" x 35'
	Gummed Paper Tape Water activated hinging tape with a neutral pH adhesive. Excellent tack to hold firmly without slipping.	L533-0751	1" x 130'
	Archival Mounting Strips Used for the safe, hingeless mounting of artwork to mats. Acid-free 12" strips can be cut if needed.	L533-4020	12" See Through Strips Box of 60
	Frame Sealing Tape Pressure sensitive acid-free paper that is laminated to foil to help seal the back of the frame and keep out moisture. Sticks to almost any surface.	L387-0151	1-1/4" x 85' Blue/Gray Frame Sealing Tape
		L387-0155	1-1/4" x 500' Blue/Gray Frame Sealing Tape
		L387-0156	3-1/2" x 85' Blue/Gray Frame Sealing Tape
	ABACA Tape Abaca self-hinging tape incorporates the strength and supple nature of Abaca paper along with strong acrylic adhesive that is permanent.	L533-0754	7/8" x 150' Abacasa Self-Hinging Tape

SLICE® Cutting Products

Frameworkare is a full line distributor of SLICE® products. Slice blades are manufactured safer than any other traditional blades. These blades stay sharper longer than traditional steel. The listing of the various styles and sizes can be found on our website @ www.frameworkarellc.com

SLICE® ceramic blades offer many other advantages over steel

- Never rust
- Chemically inert
- Doesn't require any oily coating or lubricant
- Safe up to 1600 degrees Celsius
- Non-sparking, non-conductive, and non-magnetic
- Maintenance-free
- Do not require sharps box disposal
- Recyclable
- Safe for clean rooms

What Sets SLICE® Utility Tools Apart?

All Slice blades are made of 100 percent zirconium oxide, an advanced ceramic that's rustproof, non-conductive, anti-magnetic, and won't spark. Slice applies its patent-pending finger-friendly edge grind to this material. This creates a blade that effectively cuts materials but is safe enough to touch.

PRODUCT	DESCRIPTION	PART NUMBER	PART DESCRIPTION
	SLICE® Mini Cutter Auto-Retractable or Manual The Slice Mini Cutter is one of the most versatile tools to have for any framing project! Cut everything from paper, tape, cardboard, foamboard, kraft paper and packaging and more.	10514	Slice Mini Cutter Auto-Retractable

PRODUCT DESCRIPTION		SUBSTRATE CUTTING CAPABILITIES
Part # 04-720 	FSC Multi-Material Cutter 65" Features interchangeable cutting head design supporting a wide range of material substrate cutting capabilities. Handles material sheets up to 65" high. Purchase Package Includes: (1) 1/2" Blade Holder (1) ACM Cutting Wheel Holder (1) Acrylic Blade Holder (1) Tube of 10 FSC Blades (1) Set of Aluminum CompositeWheels (1) Tube of 10 Acrylic Scoring Blades (1) Tool Caddy (2) Material Production Stops (1) Sight Laser Line (1) Manual	- Aluminum Composites Up to 4mm - Aluminum Sheets Up to .063" - Corrugated Plastics Up to 1/2" (13mm) - PVC Up to 1/2" (13mm) - Foamboard Up to 1/2" (13mm) - Plastics & Acrylics Up to 1/4" (6mm) - Glass/Mirrors Up to 1/4" 6mm) - MDF Up to 3/32" (2.4mm) See website for replacement blades and accessories* NOTE: FSC Multi-Material Cutter can be used free standing or mounted to a wall -Free standing - 92" (234cm) tall -Wall mounted - 100" (254cm) tall
Part # 04-715 	3100® Multi-Material Cutter Wall mounted or free standing (requires optional stand), the Fletcher 3100® features interchangeable heads providing a clean, debris-free cut everytime. Handles material sheets up to 63" high. Purchase Package Includes: (4) Pillar Posts (10) Mat/Foamboard Blades (10) Plastic Blades (10) Steel 120° Glass Wheel Units (1) MDF Cutting Wheel (4) Wall Mounting Brackets (1) Manual	- Plastics & Acrylics Up to 1/4" (6mm) - Gator Board Up to 1/2" (13mm) - Aluminum Sheets Up to .040" - MDF Up to 3/32" (2.4mm) - ACM Up to .078" (2mm) - Glass/Mirrors Up to 1/4" 6mm) See website for replacement blades and accessories*
Part # 04-712 	3000® Multi-Material Cutter 60" The Fletcher 3000® Wall Machine features a 3-position cutting turret that contains a glass cutting wheel unit, plastic scoring blade, and mat/foam board cutting blade mounted in their respective positions on the turret for quick changeover from one material to another. Mounts on wall or free standing. Purchase Package Includes: (10) Mat/Foamboard Blades (10) Plastic Scoring Blades (10) Glas Wheel Units (4) Wall Mounting Brackets (1) Manual	- Glass Up to 1/4" (6mm) - Mirror Up to 1/4" (6mm) - Acrylic Up to 1/4" (6mm) - Matboard 4, 8, 12 ply - Foamboard Up to 1/4" (6mm) See website for replacement blades and accessories*

AMP™ Frame Joining Products & Equipment

The U-Series product line provides miter joining solutions from manual entry level to fully automatic, multichannel units for high production output. Handles joining application found for picture frames, canvas stretcher bars, mirrors and more.

PRODUCT	DESCRIPTION	PART NUMBER & QUANTITY
	Soft Power Twist® (SPT) V-Nails for Soft Wood Designed to pull the joint tightly together. Manufactured from high quality steel. Will work only in U-Series Underpinners.	08-337 1/4" (7mm) - Box of 4000
		08-342 3/8" (10mm) - Box of 3000
		08-347 1/2" (12mm) - Box of 3000
		08-352 5/8" (15mm) - Box of 2000
	Hard Power Twist® (HPT) V-Nails for Medium/Hard Wood Designed to pull the joint tightly together. Manufactured from high quality steel. Will work only in U-Series Underpinners.	08-332 3/16" (5mm) - Box of 5000
		08-335 1/4" (7mm) - Box of 4000
		08-340 3/8" (10mm) - Box of 3000
		08-345 1/2" (12mm) - Box of 3000
		08-350 5/8" (15mm) - Box of 2000
	High Density Fiber (HDF) V-Nails for High Density Frames Designed to pull the joint tightly together. Manufactured from high quality steel. Will work only in U-Series Underpinners.	08-334 1/4" (7mm) - Box of 3200
		08-339 3/8" (10mm) - Box of 2400
		08-344 1/2" (12mm) - Box of 2400
		08-349 5/8" (15mm) - Box of 1600

PART #
178720009

MOULDING WIDTH:
1/4" TO 5-1/8"
(6-130 mm)

MOULDING HEIGHT:
1/4" TO 3-1/4"
(6-80 mm)

V-NAIL SIZES:
5, 7, 10, 12, 15 mm
(SW-HW-HDF)

Stand sold separately

U-200P Semi-Automatic/Pneumatic Underpinner*

Bench-top frame joining machine. Operates only with pneumatic air, no electrical hook-up needed. Quick-change, magnetic pad hold down feature fitting most moulding profiles. Dual function foot pedal for separate control of mould clamping and V-Nail insertion.

PART NUMBER	FRAMES JOINED PER HOUR	DIMENSIONS/WEIGHT		POWER REQUIREMENTS
		in	mm	
178720009	Low Production Usage	Length: 18"	450 mm	No Power Required
		Width: 13"	330 mm	
		Height: 18"	450 mm	
		Weight: 77 lbs	35 kg	

U-200 Manual Underpinner (part no. 04-007) Stand included. No compressed air or electric required.

PART #
04-001

MOULDING WIDTH:
1/4" TO 2-3/8"
(6-60 mm)

MOULDING HEIGHT:
1/4" TO 3-1/4"
(6-80 mm)

V-NAIL SIZES:
5, 7, 10, 12, 15 mm
(SW-HW-HDF)

U-300 Underpinner Semi-Automatic I Pneumatic*

This is a bench-top frame joining machine and the design allows the operator to set the front and back stops for V-Nail insertion. A pneumatic pedal actuates the V-Nail insertion.

PART NUMBER	FRAMES JOINED PER HOUR	DIMENSIONS/WEIGHT		POWER REQUIREMENTS
		in	mm	
04-001	Low Production Usage	Length: 19"	485 mm	Compressed Air 3NI at 5 Bar

04-006
Single Level

PART #
04-016
Multi- Level

MOULDING WIDTH:
1/4" TO 4-1/2"
(6-108 mm)

MOULDING HEIGHT:
1/4" TO 3-1/4"
(6-82 mm)

V-NAIL SIZES:
5, 7, 10, 12, 15 mm
(SW-HW-HDF)

U-500 Underpinner
Memory Programmed I Single-Channel & Multi-Level*

Recommended for high-volume production facilities that require the primary use of a single sized V-Nail for frame joining. Capable of storing 5,000 different frame profiles and features a user-friendly touch screen interface. The U-500 has the capability of joining single or multi-level frames in addition to joining both 45° and 90° angles. NOTE: Butt Joint Kit needed for 90° angles.

AMP™ T-400 Double Miter Saw

Designed to cut 45° miters precisely for picture frames, this heavy duty saw is built for medium to high production environments. It's unique pneumatic control system results in a very smooth down-stroke movement, precise cut and a quick return process.

T-400 Unique Performance Features

- Maximum Moulding Width 4" (Up to 100mm)
- Maximum Moulding Height 3 1/2" (Up to 88mm)
- Minimum Moulding Cut Length (internal dimension) 3" (75mm)
- Production Capacity Up to 800 Cuts/Hour
- Adjustable blade descent speed for soft or hard wood requirements
- Adjustable cutting speed
- Adjustable blade height
- Directional off-cut chute for external waste collection

EMERGENCY PUSH CUT-OFF SWITCH

SAW BLADES ARE FULLY ENCLOSED - NO EXTERNAL MOVING PARTS

		MDF	Height: 71"	1800 mm	
			Weight: 1100 lbs	500 kg	

AMP AG 2000 Cut Measurement System

Integrates with AMP's T-400 to provide a complete system that automatically measures moulding lengths and double miter cutting for production picture framing requiring mass customization. For OEM operations who produce many different frame sizes customized to specific customer needs, the AG2000 offers production operations flexibility and quick change over efficiency to different sized frames while controlling production cost.

AG 2000 Unique Performance Features

- Automatic Positioning System
- Programmed Measuring System
- Electronic positioning stop with precision and repeatability
- Automatic set-up time
- Maximum Internal Cut – 78.5" (2000 mm)
- Maximum External Cut – 87" (2200 mm)
- Minimum External Cut – 6" (150 mm)
- Measuring Accuracy – ±.004" (±0.1mm)

AG-2000 Software Functionality

- Easy Touch Screen Programming – multi-language
- Program frame size & cutting sequence
- Express screen option for pre-set frame sizes
- Unique frame In Frame functionality
- Automatically programs up to 5 frame layers
- Automatically calculates external dimensions of first Inner frame

AG-2000 - M
AUTO GAUGE

WIDTH MEASUREMENT DEVICE AUTOMATICALLY MEASURES MOULDING WIDTH AND IS TEMPORARILY STORED FOR RUNNING THE JOB.

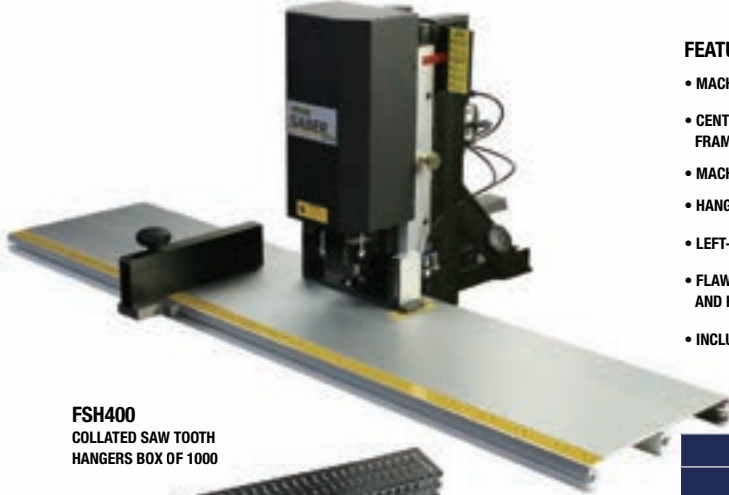

SCANNER READER IS AVAILABLE FOR READING SPECIFIC FORMATTED BARCODES OR QR CODES FOR LOADING AND SAVING PROGRAM IN CONTROLLER. (SOLD AS ACCESSORY ITEM)
