New Convenient Packaging for Fletcher's Automated Glass Cutting Technology

This market exclusive blister packaging is designed to package Fletcher's line of carbide cutting wheels, inserts, clip units and axles, offering customers the benefits of easier component identification at the process line and better inventory control.

Since 1868, Fletcher-Terry has revolutionized advanced cutting solutions for numerous global industries.

Today, with a distribution network to 60 countries worldwide, we are proud to serve the glass production & fabrication industries, sign & graphic, picture framing and retail hardware, while continuing to provide advanced cutting methods and outstanding global customer service support. Staying one step ahead of your material cutting, scoring and trimming needs has made us a global leader.

New Convenience Packaging - Customer Process Value and Benefits

- Provides easy component identification for process line operator reducing the risk of using wrong wheel angle or other glass cutting components
- Allows customized package labeling based on individual customer needs e.g., production line identification, company's internal code or part number aiding internal process control standards
- Improves customer's inventory and cost control as compared to other supplier's packaging methods
- Allows customers to purchase wheel holder/axle/cutting wheel assemblies rather than by individual components – provides easier handling for process line operator

Peel away corner for easy component removal, product shown in actual size
