The Fletcher-Terry Company Announces Equipment Financing Program

U.S. customers can now explore flexible financing options for eligible equipment through a streamlined inquiry process

EAST BERLIN, Ct, May 27, 2026 — The Fletcher-Terry Company, a leading manufacturer and provider of framing material cutting, joining, and finishing solutions, announced today the availability of its equipment financing program for customers, creating a new path to explore financing options for eligible cutting and joining equipment ranging from manually-operated to fully automated systems.

The program is designed to help customers invest in the equipment their businesses need while preserving cash flow and supporting growth. Whether a customer is starting a new operation, expanding capacity, replacing equipment, or improving efficiency, the program offers a more accessible way to move forward with equipment investment.

Through a dedicated online inquiry process, customers can learn more about eligible equipment, review program details, estimate monthly payments using an online calculator, and submit an inquiry to begin the conversation. The streamlined approach is intended to help customers evaluate options early and move more efficiently from inquiry to purchase.

“We developed this program to help remove barriers for customers who are ready to invest in equipment but need greater financial flexibility,” said Maria Oliveira, Director of Marketing at The Fletcher-Terry Company. “It gives customers a more accessible path to move forward with AMP™ and Fletcher® equipment that supports their business goals.”

The equipment financing program is available to all customers within the company’s U.S. brand portfolio, including Frameware, LLC and applies to eligible AMP and Fletcher cutting and joining products. Customers can learn more and submit an inquiry by visiting www.fletcher-terry.com/financing.
